Now is the time to consider **KennelSol APS®** chlorine dioxide air purification technology. Keep your facility safe and odor free with this easy to use system. Chlorine dioxide gas actively destroys and absorbs airborne odors rather than masking scents with fragrances. Numerous scientific studies have shown it to have demonstrated efficacy against viruses and bacteria in the air that surface disinfectants cannot control. Request a copy of The Journal of Virology study "Protective effect of low-concentration chlorine dioxide gas against Influenza A virus infection." New packaging for extra cost savings and **FREE KennelSol** is a sweet smelling offer!!

**New!! Hydro Sprayer**

Mop and bucket cleaning can contribute to the spread of disease since all disinfecting type products lose their efficacy as the water becomes dirty. To maintain a disease and odor free facility, consider switching to one of our automatic dilution systems for applying your cleaning solutions. Now you can apply **KennelSol** or **OdorPet** at the end of your hose with our **NEW Hydro Satellite Sprayer!** Spray and foam nozzles are conveniently located on the sprayer which attach to the rotating head for selecting multiple spray patterns. Handy controls and lightweight high intensity molded plastic insures for long lasting durability. (see reverse)
