## RABBIT HEMORRHAGIC DISEASE BULLETIN

August 25, 2020

We are writing to all of our customers and distributor partners to provide our latest update regarding disinfecting agents for emerging pathogens.

We are pleased to announce that our disinfectants **KennelSol®** and **KennelSol® HC**, are both listed on the **EPA's List O** <https://www.epa.gov/pesticide-registration/list-o-disinfectants-use-against-rabbit-hemorrhagic-disease-virus-rhdv2#check> as meeting the EPA's criteria for use against RHDV2, the virus that causes Rabbit Hemorrhagic Disease.

Both of these products qualify for **emerging pathogen claims** per the EPA's "Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered Disinfectant Labels." Our EPA Stamped Master Labels have been updated accordingly in July of 2020.

**KennelSol®** and **KennelSol® HC** both meet the criteria to make claims against certain emerging viral pathogens from the following viral categories:

For an emerging viral pathogen that is a/an...	...follow the directions for use for the following organisms on the label:
Enveloped virus	Feline Picornavirus
Large, non-enveloped virus	Feline Picornavirus
Small, non-enveloped virus	Canine Parvovirus

Accordingly, **KennelSol®** and **KennelSol® HC** have demonstrated effectiveness against viruses similar to RHDV2, the virus that causes Rabbit Hemorrhagic Disease, on hard, non-porous surfaces. Therefore, **KennelSol®** and **KennelSol® HC** can be used against RHDV2 when used in accordance with the directions for use against canine parvovirus on hard, non-porous surfaces. Refer to the USDA fact sheet [https://www.aphis.usda.gov/publications/animal\\_health/fs-rhdv2.pdf](https://www.aphis.usda.gov/publications/animal_health/fs-rhdv2.pdf) for additional information.

Please reach out with any questions or concerns you may have.

Respectfully,

Dr. Shawn E. Seitz
