

The Total Disinfection Biosecurity Solution.

The Industry's Only Certified Electrostatic Chemical Delivery System with Negative Induction Charged Technology.

BYOPLANET® ELECTROSTATIC SPRAYERS are the most innovative spray systems on the market providing 360° wrap-around disinfectant coverage with less waste, quicker re-entry into the environment, and better efficacy against pathogens.

These charged particles are attracted to surfaces leading to an even spread and adherence to the surface, increasing efficiency and drastically reducing human error.

ELECTROSTATIC SPRAYER BENEFITS

IMPROVED SURFACE COVERAGE

Covers more than 18,000 sq ft per hour.

6x more surface coverage than traditional manual disinfecting methods.

INCREASED PRODUCTIVITY

Disinfect from a distance of 2-4 feet from surfaces covering more space in less time.

Remove labor intensive and lengthy process of using manual method to disinfect.

RETURN ON INVESTMENT

▶ Save on chemistry by using 73% less disinfectant solution than manual disinfecting methods.

Save time it takes to disinfect by 75% over traditional manual disinfecting methods.

HEALTHIER INDOOR AIR

Use safer chemicals due to the increased effectiveness of ByoPlanet® sprayers.

Less chemical exposure from low-volume electrostatic spraying.

Washes the air of particulates and pathogens.
