

# SANITATION PROGRAM ASSESSMENT TOOL

Use our assessment tool to see how your facility ranks

Ranking	Must Haves in Your Cleaning System	Recommended Sanitation Program Products
<b>BASIC</b>  Recommended for a basic sanitation program	<b>Big D's of your facility:</b>	
	<b>HSD-Hard Surface Disinfectant / Cleaners</b>	KennelSol for cleaning and disinfecting
	<b>Degreasers</b>	Orange Citrus Degreaser for heavy duty cleaning
	<b>Deodorizers</b>	OdorPet and PX550 for cleaning pet messes and for pet odor and urine elimination
	<b>Drain Maintenance</b>	Alpha Bio-Drain for drain maintenance
<b>INTERMEDIATE</b>  To take your sanitation program to the next level, add the following items	<b>"Big Gun" for disease outbreaks / control - It's the nuclear bomb for control when needed</b>	
	<b>HLD/S - Higher level disinfection / sterilizer</b>	Stericide, Trifectant
<b>ENHANCED</b>  To take your sanitation program to the next level, add the following items	<b>Air, Hand and Cleaning Aids</b>	
	<b>Air Purification</b>	StayFresh APS a chlorine dioxide treatment of air handlers and facility air, plasma flow technology, and ultraviolet light
	<b>Touchless Hand Sanitizers</b>	Hand Sanitizers
	<b>Microfiber</b> cleaning products color coded for areas of use (RED for isolation areas, BLUE for general cleaning, etc.)	Microfiber Mops & Cloths
<b>PROFESSIONAL</b>  To take your sanitation program to the next level, add the following items	<b>Surface Saturation &amp; Green...</b>	
	<b>Electrostatic Sprayers</b> - This is a spray technology that electrostatically charges particles so that they go around surfaces that are not in the direct line of the spray for better overall surface saturation of the entire surface (all sides) of areas being treated – areas often overlooked because they are hard to get at, etc.	ByoPlanet Electrostatic Spray Applicators
	<b>Aqueous Ozone</b> - This is ozonated water – it's 50% more powerful than bleach and kills micro-organisms 3000 times faster – and it breaks down into nothing more than water and oxygen – that's about as safe as you can ask for.	Hygeia handheld liquid Ozone Sprayer, SAO Dispenser (Lotus PRO Aqueous Ozone)
<b>VETERINARY / HOSPITAL GRADE</b>  To take your sanitation program to the next level, add the following items	<b>High Tech</b>	
	<b>Low Pressure Low Flow</b> - LP Applicators These spray applicators do not aerosolize particles and microbes like seen with high pressure sprayers / pressure washers. In other words, you don't want to spread microbes by blasting them into the air.	LPLFs Applicators, Karcher Veterinary-Grade Sprayer/Mister
	<b>Industrial Equipment</b> - These last much longer, so you buy machines less frequently – Lasts 3 times longer than residential units at 40-hour per week duty cycles – 15,000+ cycle machine life.	ENCORE washers and dryers. Also commercial scrubbers like Karcher Floor Scrubbers and Karcher Armada Turf Grass Scrubber
	<b>ATP Testing for Organic Debris</b> - This tells you how clean your surfaces are, and how well your staff is doing at their job. Remember, cleaning is upwards of 90% of the battle of disease control.	Hygiene ATP Testing

Alpha Tech Pet is proud to be your expert in establishing a sanitation program tailored specifically for your needs; a program that's environmentally sensitive, superior in its efficacy, and maintains the highest standards of safety for animals under your care and for your employees.
