## **TERSANO TECHNICAL BULLETIN**

## SYSTEM LIGHTS ON UNIT - What do they mean?

Refer to the following chart to identify what the illuminated light indicate. Always check that the serial number on **both** the blue cartridge filter and stabilizer match.

These serial numbers on **both** the blue cartridge filter and stabilizer must always match.

Stabilizer

First LED	Second LED	Third LED	Fourth LED		SERVICE
System Ready	System Charging	Change Sensor (Low Ozone)	Replace Stabilizer		SERVICE
Green	Solid amber/ yellow	Solid red	<b>Flashing</b> amber/ yellow	<b>Solid</b> amber/ yellow	Red light

System ready to dispense aqueous ozone.	System charging as it is turned on and infusing water with ozone.	<ul> <li>Light is illuminated red and still continues to dispense water.</li> <li>Check the following: <ol> <li>Do they smell ozone in the water?</li> </ol> </li> <li>Did they just change the stabilizer?</li> <li>Confirm that unit is connected to cold water.</li> <li>If yes to any of above, turn unit off, start again then run the unit for 1-2 minutes to see if light will clear. If it doesn't, then call the toll free number at 1.800.727.8835.</li> </ul>	Flashing yellow light indicates that the blue cartridge filter and black stabilizer will need replacement in 50 gallons.	Blue cartridge filter and the black stabilizer need replacement immediately. Ensure you have a new lotus PRO Stabilizer Module Kit (LCA114K or LCA118K) in inventory to avoid down time.	The unit must be serviced. Call the toll free number at 1.800.727.8835
