Roger Oakley
Director of Maintenance

April 21, 2020

To Whom It May Concern:

I am the Director of Maintenance for the Bellingham Public Schools in Bellingham, Massachusetts. We service approximately 3,000 students, teachers and administrators. We met GreenPlanetScientific.com (GPS) and AlphaTechPet.com (ATP) in 2014 and decided to use their Stabilized Aqueous Ozone (SAO) cleaning and sanitizing system.

It was the best move we have ever made in my 12 years of servicing our district.

We were looking for an alternative to bleach and other chemicals that were not allowed in our buildings, as well as trying to cut maintenance costs. SAO made the impossible possible.

Since installing the SAO units, we have reduced our chemical use by over 60% which also means no chemical smells, eliminated all residue (no slips or falls) and have decreased student and staff absentees. We have also reduced our cleaning costs by over 60%. It was truly amazing and exceeded all expectations. For the last 5 years our student attendance has averaged 95%.

I highly recommend the SAO product and GPS/ATP. We couldn't live without it.

Since the COVID-19 issue, our DPW, police department, library and town hall buildings are now using aqueous ozone sanitizing and cleaning methods.

Sincerely,

Roger Oakley
Director of Maintenance
